

SYMBOSIS: GEMZ x Bodi Samba

Von Racknitz + Baer Gallery is pleased to host the launch of the first luxury hair jewelry brand GEMZ. GEMZ creates hair jewelry for every occasion that will last a lifetime and is reusable and unique. Accompanying the launch, the gallery is presenting photographs of SYMBIOSIS the campaign shot by photographer and artist Bodi Samba.

„By portraying the interplay of the four elements: earth, water, air, and fire as the source of life, we focus on the idea that the symbiosis of multiple components was, is and always will be necessary for creating harmony and growth in nature as well as in society.” - GEMZ

GEMZ conceptualized each element and interpreted it as a certain hairstyle with customized hair jewelry. The observer sees four persons „in their element“ reimagining the connection to as well as the expression of earth, water, wind, and fire. Disrupted visions, intense colors, and strong poses in the photography - these images show a glimpse of the various ways of expression that hair and jewelry hold and how they can be translated into art - a symbiosis between three different worlds. Kiala Kanzi and Fily Mihan – the founders of GEMZ set a statement with their jewelry.

Valuing cultural roots, individualism, community, and sustainability alike while opening the dialogue about the interconnectedness of different art forms.
